

!!!EMERGING DRUG WARNING!!!

Nitazenes In NYC's Drug Supply!

Nitazenes

Nitazenes are becoming increasingly common in the drug supply, so read below to learn more!

Nitazenes are synthetic opioids with varying potencies, with some samples testing for potencies up to 10x that of fentanyl.

- Signs of Overdose - **Use Narcan & Call 911:** Slow/shallow breathing, bluish/greyish lips and complexion, passing out, coma, and death.
- Signs of Withdrawal - **May Require Medical Attention:** Excessive sweating, restless legs, fever, dizziness, flu-like symptoms, blackouts, anxiety, and panic attacks.

!!!EMERGING DRUG WARNING!!!

Nitazenes In NYC's Drug Supply!

IF USING STREET DRUGS...

USE NARCAN & CALL
911 IF YOU OVERDOSE!
